

ABOUT US

FFT is the industry leader in powerful, cost-effective products that not only clean the environment but improve it.

The company was founded in 1991 with a simple goal: to develop a world-class set of products that could outperform the competition without harming the environment. An innovative goal which required a commitment to scientific development, an atmosphere of collaboration, and a willingness to hold the company to the highest standards. As the science developed it became clear the products could not only surpass industry benchmarks but redefine them.

The first product line offered environmentally friendly solutions for the FAT, OIL, and GREASE found in municipal wastewater facilities. (The original name, FOG-Free Technologies, was a nod to our success against these substances.) The original solutions were so effective, the company became — and remains — the preferred provider for some of the largest municipalities.

The aftermath of the 2010 Deepwater Horizon disaster in the Gulf of Mexico, FFT scientists saw a pronounced need for a non-toxic oil dispersant that would do no further damage to already compromised natural resources. Through several successful remediation projects, FFT has earned a reputation for excellence and distinctions including approval as the sole provider of oil dispersant for the nation of Aruba.

The company has now expanded the technology into revolutionary solutions for the Turf market and into the AG market: Non-toxic plant based solutions supporting faster growth, healthier plants and no toxic residuals.

Turf

FFT REBUILD

GROWTH — INVIGORATION — PROTECTION.

Over the years turf builds up unwanted products like wax and lipids. You can count on FFT REBUILD to treat your greens, tees and fairways, restoring natural nutrient balances and creating optimal growth and maintenance conditions.

Most products providing protection from disease, pests and environmental stresses are artificial and cannot be degraded by plant enzymes, physical or chemical input resulting in their accumulation in soils which deprives the plant of nutrient uptake causing soil “caking”

Stimulated by water, FFT REBUILD is applied at the root zone and foliar preparing the grass for a more robust nutrient uptake and rebuilding residuals. Testing has proven FFT REBUILD to increase plant resistance and multiply plant productivity rates.

Rebuilds turf without negative side effects

Safe for soil microbial activity

Rehabilitates your turf instead of expensive replacement

TURF PRODUCTS

Soil Conditioner			PART #
FFT Rebuild TG	Soil Conditioner	4 x 1 Gal.	
FFT Rebuild TG	Soil Conditioner	2 x 2.5 Gal.	
FFT Rebuild F	Soil Conditioner	2 x 2.5 Gal.	
FFT Rebuild F	Soil Conditioner	250 Gal. Tote

Turf

NRX

Insecticidal Soap Equivalent

PLANT-PARASITIC NEMATODES are microscopic worms with a needle-like structure which is used to pierce plant cells to get nutrients resulting in damage the root system by reducing the ability of the plant to obtain water and nutrients from the soil.

NRX changes all that.

NRX is a concentrated blend of surfactants, polymers and lemon fragrance for application through spray equipment.

Using FFT science and a pleasant scent, NRX actually attracts pests and then eliminates them, allowing your turf to return to its natural, healthy state.

Its low burn potential makes it ideal for all types of turf, both cool and warm season grasses.

FFT RECOVER PREMIUM WETTING AGENTS

Wetting agents hold the moisture at the root profile to conserve water and enhance lawn & gardens natural ability to grow. FFT Wetting Agents are available as liquid, tablets and granular.

FFT RECOVER is a premium wetting agent that promotes uniform hydration within mineral soils. FFT RECOVER ensures moisture is available in the turf grass root zone and optimizes plant health and quality. FFT RECOVER's proprietary blend is nontoxic, biodegradable and safe for the environment.

FFT RECOVER G is a premium granular wetting agent that promotes uniform hydration within mineral soils. FFT RECOVER ensures that moisture is available in the turf grass root zone and optimizes plant health and quality. FFT RECOVER proprietary blend is nontoxic, biodegradable and safe for the environment.

FFT RECOVER 120 is a long-lasting soil wetting agent precision-engineered to improve moisture distribution in the turf grass root zone up to 120 days.

FFT RECOVER performs in 3 phases; first flushing water through the root system, second to reuptake minerals and nutrients and finally retaining moisture at the root level.

Premium Wetting Agent for Greens			PART #
FFT Recover TG	Wetting Agent	2 x 2.5	
FFT Recover TG	Wetting Agent	30 Gallons	
FFT Recover TG	Wetting Agent	275 Gallons	
FFT Recover FW	Wetting Agent	2 x 2.5	
FFT Recover FW	Wetting Agent	30 Gallons

FFT RECLAIM

Tablets

FFT-Reclaim is a biostimulant and can be used on turf, trees, shrubs, bushes, beds, gardens and even on indoor plants. Almost anything that grows will benefit from FFT-Reclaim.

FFT-Reclaim increases nutrient uptake, drought tolerance and seed germination. It increases the microbial activity in the soil making it an excellent root stimulator and it increases the availability of nutrients that are already in your soil and will naturally aerate the soil from the inside. It also will help to lower the pH of the soil and will flush high levels of salts out of the root zone.

BENEFITS:

- FFT-Reclaim improves soil texture and water retention.
- FFT-Reclaim is similar to auxin growth hormone, improving living cell metabolism / growth.
- FFT-Reclaim performs similarly to chelating agents and surfactants.
- FFT-Reclaim substances provide available carbon to microorganism.
- FFT-Reclaim is safe for the environment and all living organisms.

HUMIC Wetting Agent			PART #
FFT Reclaim Tablet 10	Tablet Humic	10 lb	
FFT Reclaim Pellet Pro	Pellet Pro 3% Humic	4 oz x 12	
FFT Reclaim Pellet Pro	Pellet Pro 3% Humic	8 oz x 9	
FFT Reclaim Pellet Micro	Pellet w/Micro Nutrients	4 oz x 12	
FFT Reclaim Pellet Micro	Pellet w/Micro Nutrients	8 oz x 9

FFT GREEN LEAF

YOUR TURF'S CURE TO THE ELEMENTS

FFT GREEN LEAF is a specialty blend of super strength green pigment and surfactants chosen to offer extended color and superior longevity for your turf.

FFT GREEN LEAF restores the natural green color to damaged, off-color or dormant turf.

FFT GREEN LEAF is specifically formulated for golf course and sports turf facilities to enhance and extend aesthetic turf appearances. The use of pigmented products on fine turfgrass has increased in the past five years. The most noticeable effects are better color and quality – of both actively growing and dormant turfgrasses.

Low cost per acre

Consistent color

Easy to use non clogging formula

Equipment safe non-toxic and non corrosive.

FFT Pond Dyes & Indicator Dyes

FFT POND DYE

FFT- POND DYE shades, protects, and beautifies your pond water. All plants need sunlight to grow, by reducing the amount of light penetration into the water, the dyes effectively reduce photosynthesis and reduce weed and algae growth no matter which color you choose.

FFT- POND DYE can be used year round. Normal treatments generally last 1 - 3 months in contained ponds or lakes. How long the dye will last for you will depend on how much flow you have going in and out of the pond.

Low cost per application / Consistent color

FFT-INDICATOR DYES

Green & Blue FFT-INDICATOR DYES are spray indicator dyes in water soluble liquid. It is a highly concentrated green & blue dye can mix with pesticides and fertilizers — is easy to use and non toxic.

Easy to use formula. Equipment safe, non-toxic and non-corrosive.

FFT SPECIALITY PRODUCTS

STICKER PERFORMANCE ENHANCER

DEFOAMER / TANK CLEANER

FFT Sticker Performance Enhancer

Not all chemicals adhere to all plants. FFT Sticker Performance Enhancer is an additive formulated to be added to chemicals being applied to plants to whom chemical applications don't stick.

FFT Defoamer

The preparing of certain products for application have a tendency foam. The addition of FFT Defoamer will control excessive foaming.

FFT Tank Cleaner

The accidental mixing of different chemicals can have dangerous and potentially deadly results. The FFT Tank Cleaner is an excellent way to clean equipment between applications.
